

Safe & Clean

Classrooms

**Module 6: Disinfection & Other
Hygienic Practices**

Version 2.0 (March 2026)

Our Learning

Goals

- 💧 **Cleaning, Hygiene, and Disinfection**
- 💧 How can we keep our spaces safe and clean every day?
- 💧 What can we do to protect our families, homes, schools, and communities?

Let's get started!

Topic 1

**Cleaning,
Hygiene, and
Disinfection**

Cleaning

“

Cleaning means to remove dirt or stains from something so that it isn't dirty.

Cleaning does not kill all germs, but it can help protect us from some bacteria!

”

Hygiene

“

These are the things we can do to **stay healthy** and **stop diseases** from spreading!

Some examples are **handwashing**, **bathing**, and **cleaning our food**.

”

Disinfection

“

Disinfection is when we **use chemicals** to kill germs to stop the spread of infections and diseases.

For example, using alcohol-based hand sanitizers and household cleaning products can kill germs.

”

What are the differences between Cleaning, Hygiene, and Disinfection?

**How can we keep our spaces
safe and clean every day?**

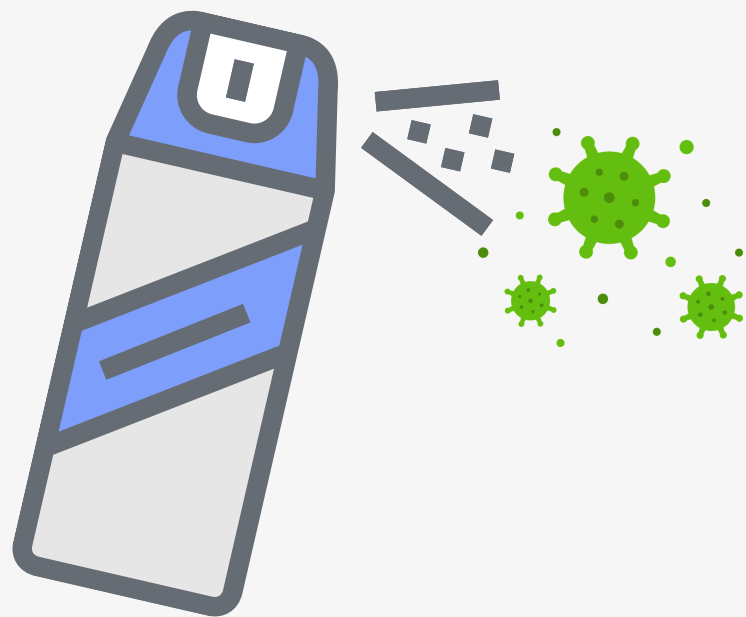

Topic 2

**What is
Disinfection?**

How do we Disinfect our spaces?

Chemical Disinfection

We can buy cleaning products like bleach, alcohol, and hydrogen peroxide from supermarkets and pharmacies.

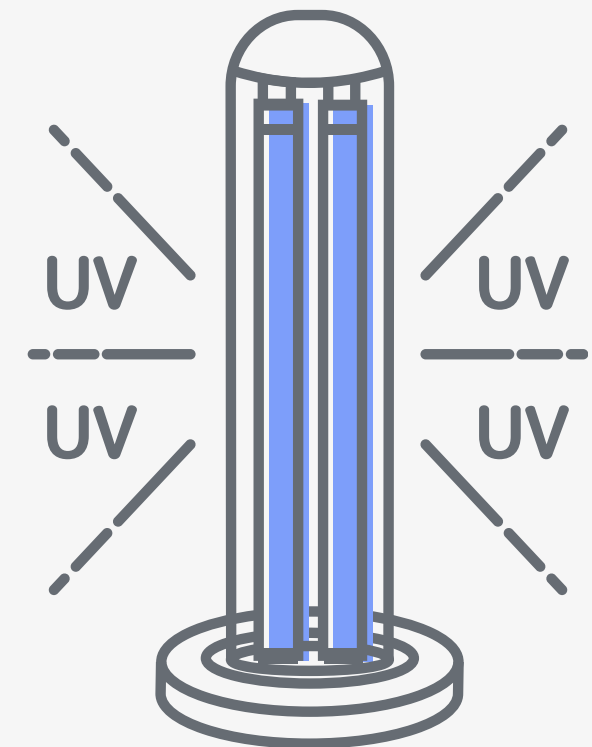

Heat Disinfection

We can use heat to kill germs, such as boiling water or steam cleaners.

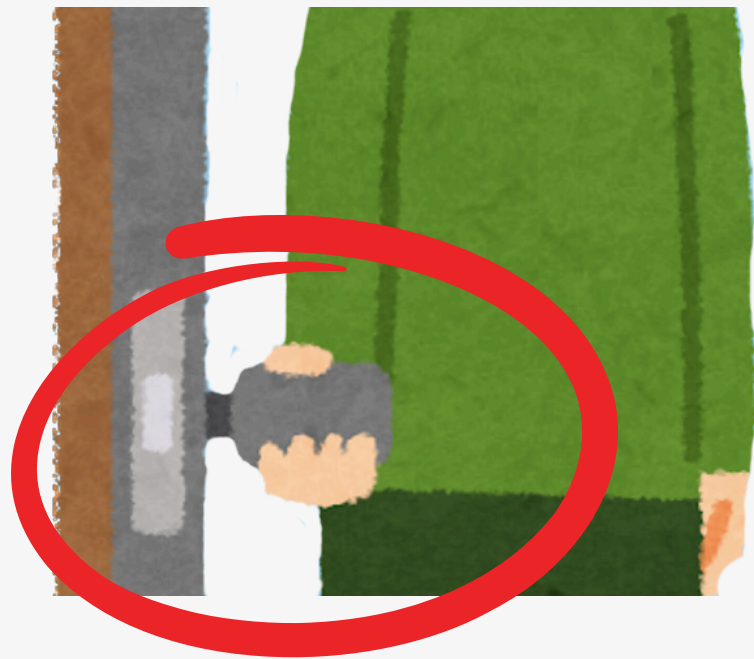

UV Light Disinfection

UV or ultraviolet light can be used to kill or stop germs. They can be found online or in specialized stores.

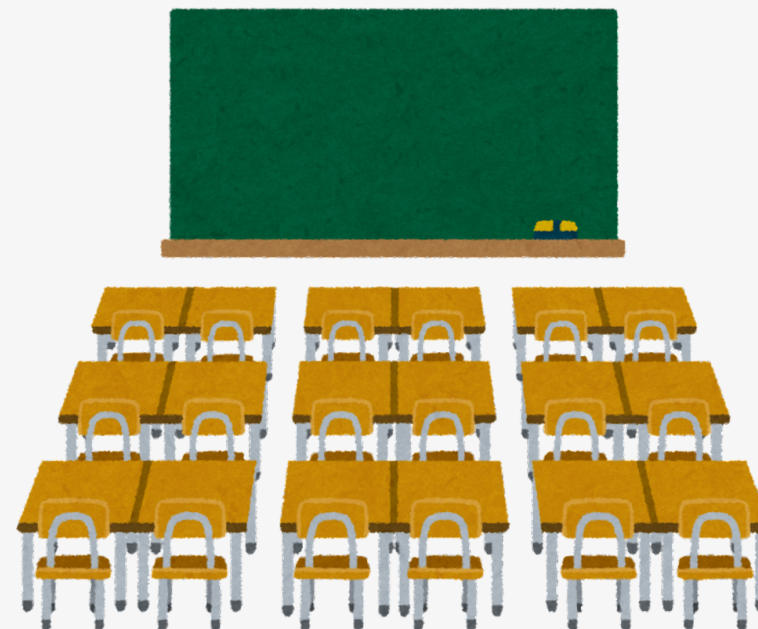

Where should we Disinfect?

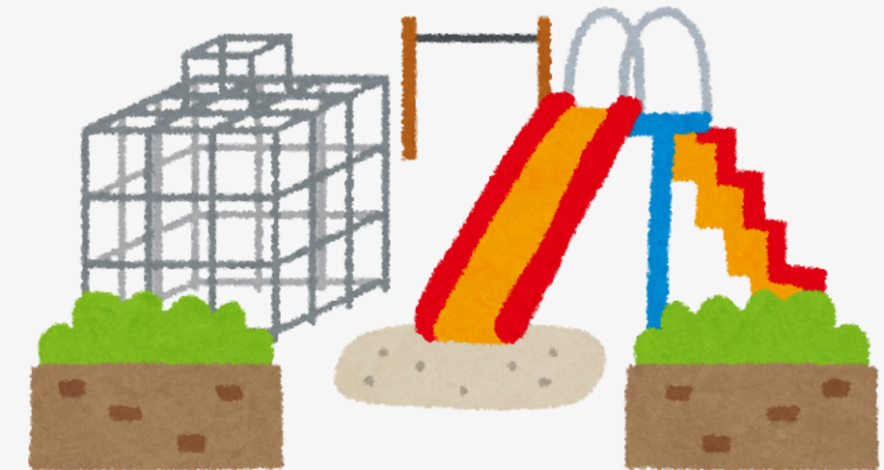

How can we keep our
community clean and our
friends and family healthy?

Places that we often
touch with our hands

Shared school facilities /
amenities

Public spaces

Can you think of more examples?

**What can we do to protect our families,
homes, schools, and communities?**

Topic 3

**Good Habits
to Practice
Every Day**

Disinfection and Hygiene for Every Day Life

20
seconds

How long you should spend
**washing your hands with
soap and water!**

60%

minimum alcohol content
for alcohol in sanitizers used when
soap and water are not available

More helpful habits for good health:

- Surface cleaning
- Personal hygiene

Student Leaders & Super Teachers!

Be a good role model

Learn and teach others

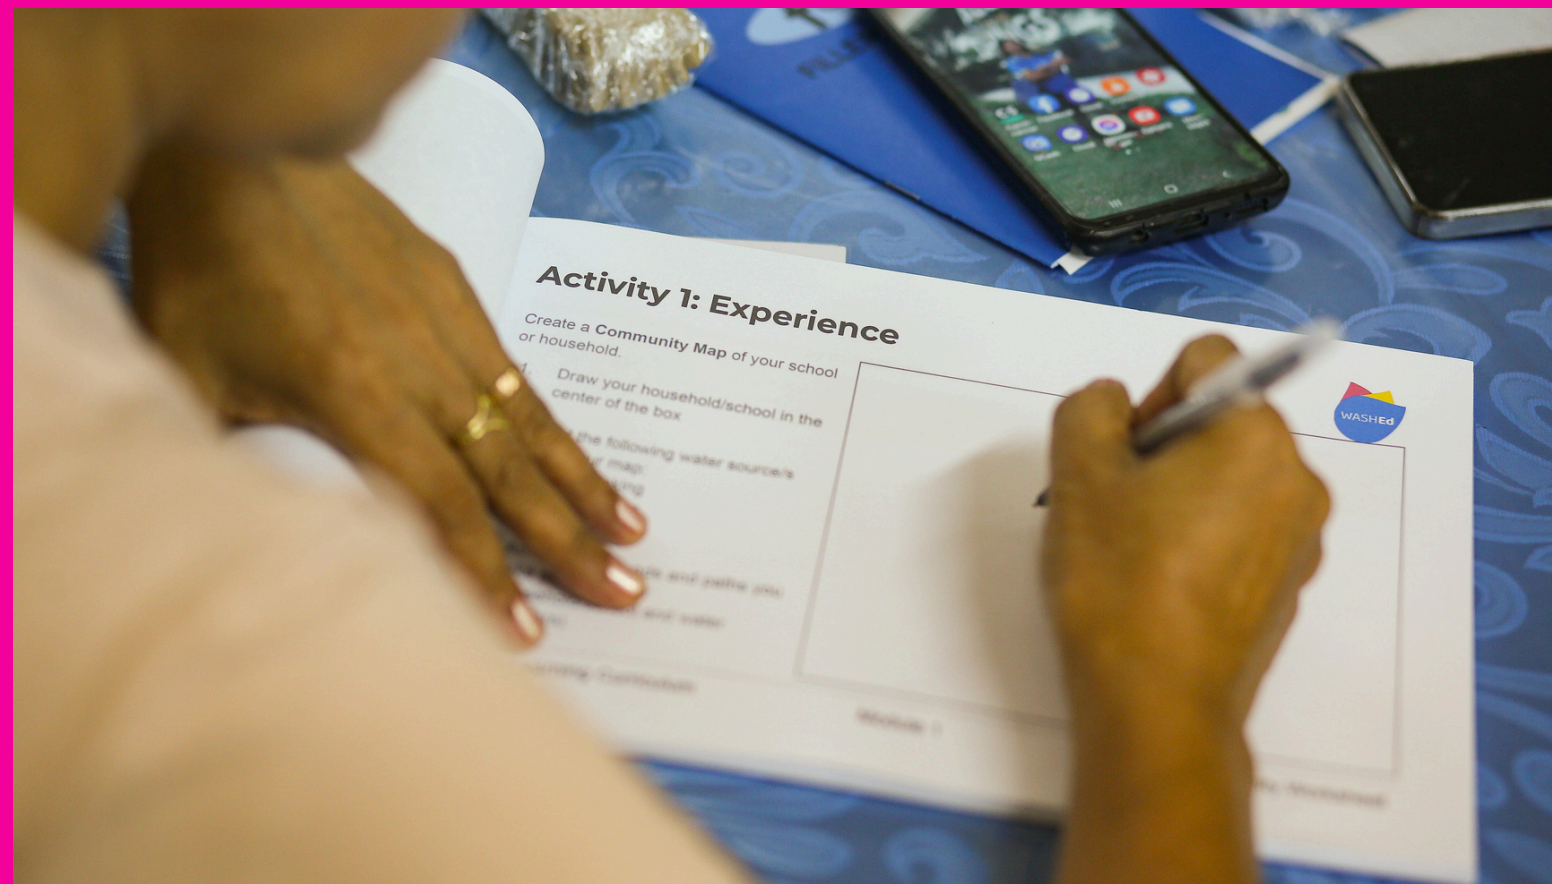

**Work together with
our community!**

Activities

for Module 6

- Classroom activities are designed using the **E-SPOT Framework** to engage Active Learning
- **Think-Pair-Share** approach is recommended for all activities

Activity 1: Experience

Activity 2: Share

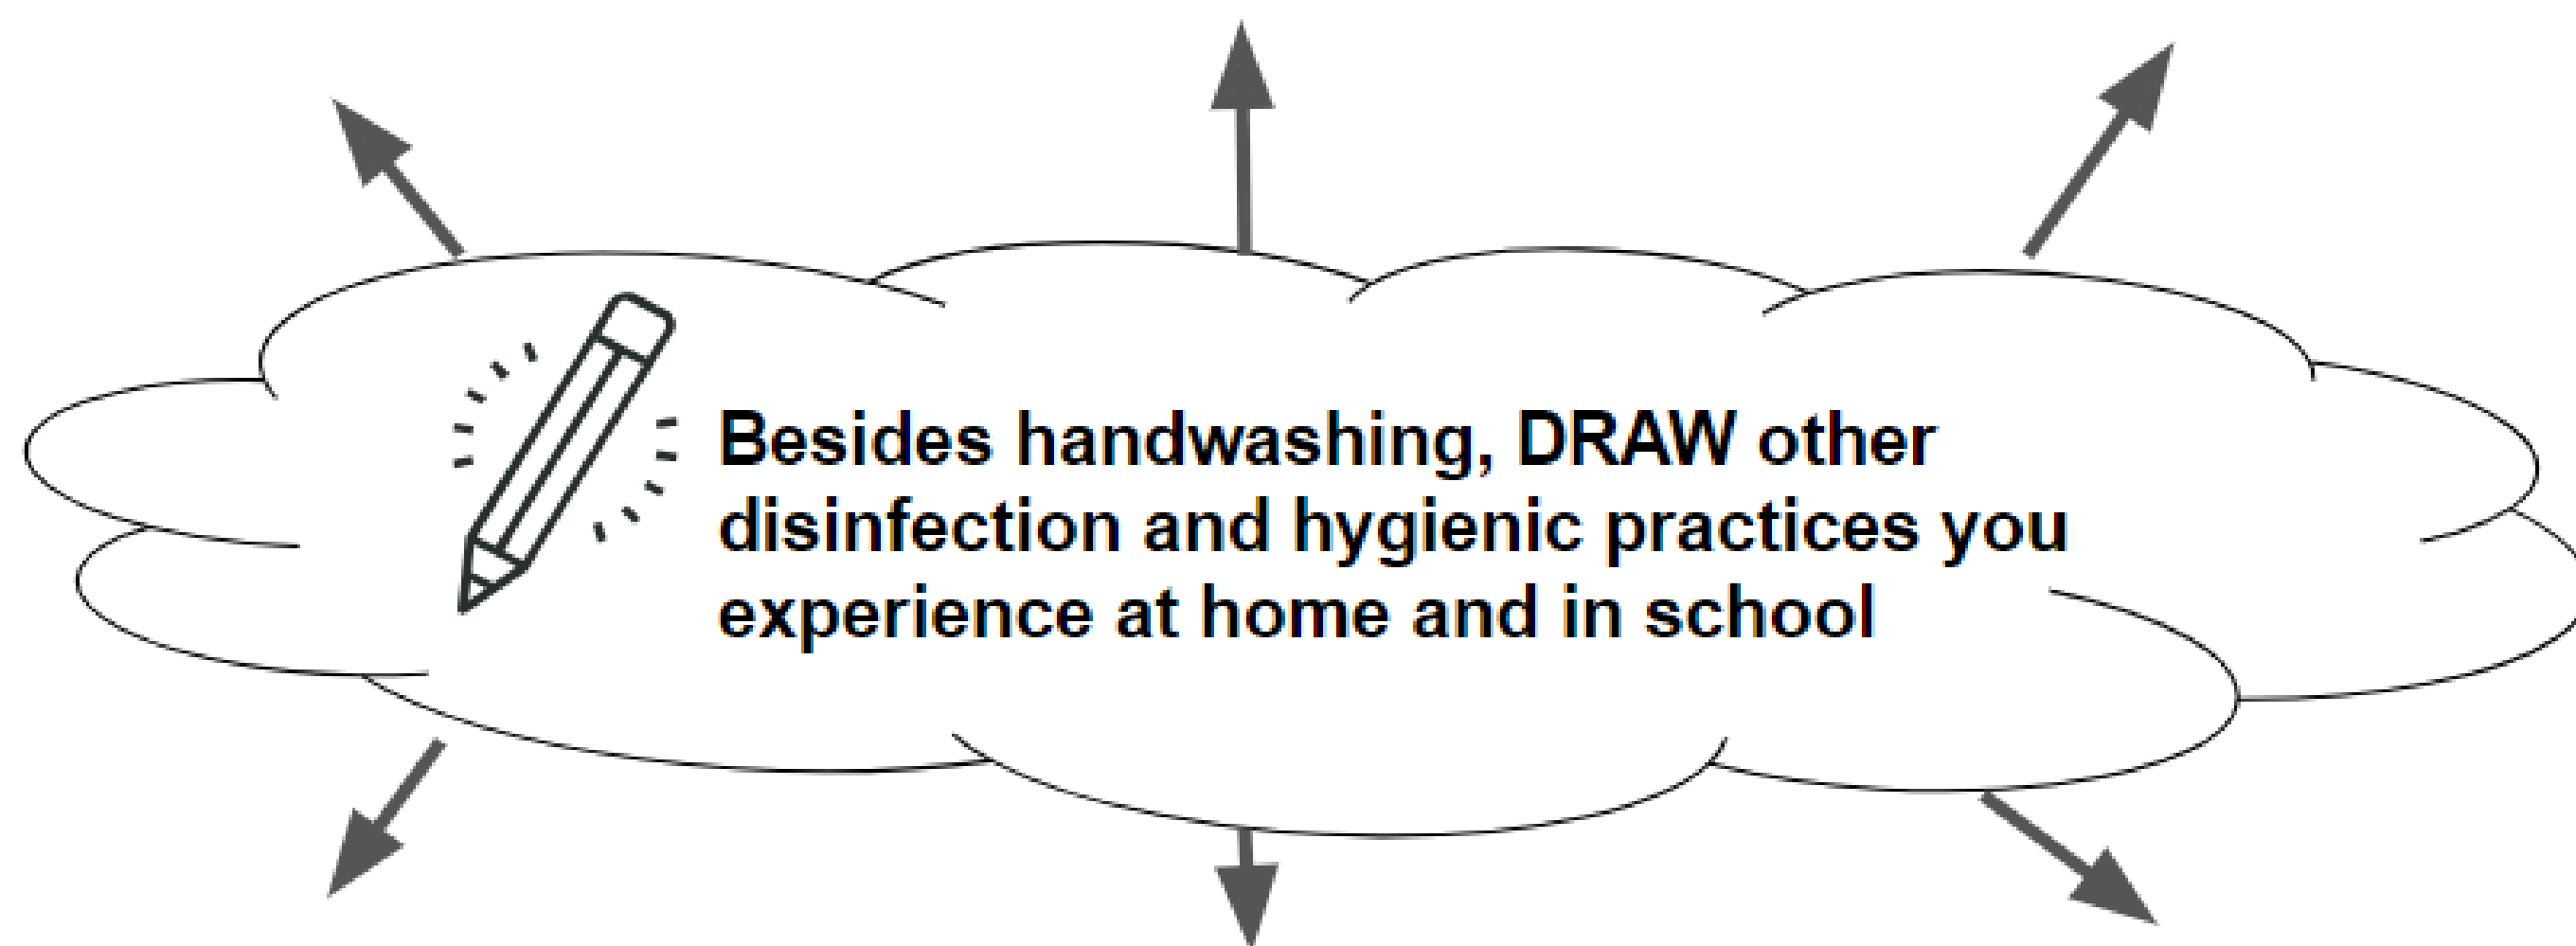

Activity 3: Process & Observe

Activity 4: Try

Digital files for the classroom activities will be available from the WASH-Ed Learning Portal

Activity 1: Experience

Activity 2: Share

In a **group**, exchange your ideas on sanitation and hygienic practices (**excluding hand washing**) that can be performed individually and collectively. Make sure you populate the table with **unique responses** per row. Do not forget to help each other as you are still working together to complete the activity.

Name	INDIVIDUAL sanitation and hygienic practices	COMMUNAL sanitation and hygienic practices

Activity 3: Process & Observe

Let us apply our learnings to understand circumstances **when and why** other disinfection and hygienic practices may be particularly useful.

	1 WHAT DISINFECTION / OTHER HYGIENIC PRACTICE IS USEFUL?	2 WHY IS IT USEFUL?	3 ARE THERE ANY TRADE OFFS?
#1 SCENARIO			
#2 SCENARIO			
#3 SCENARIO			

Activity 4: Try

Create an **Action Plan** you can introduce to your school and/or community to help promote improved disinfection and other hygienic practices. Complete the table below.

Components	Action Plan Details
WHAT	
WHO	
WHERE	
WHEN	
WHY	
HOW
