Module 5: Hand Hygiene

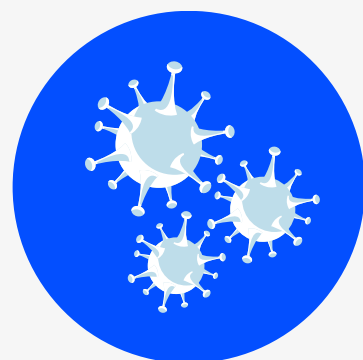

Version 2.0 (March 2026)

WASH-Ed Learning Curriculum

Module 1:

Water Resources & Accessibility

Module 2:

Water Safety & Health

Module 3:

Water Sustainability

Module 4:

Sanitation

Module 5:

Hand Hygiene

Module 6:

Disinfection & Other Hygienic Practices

WASH-Ed materials can only be used by the school and its teachers for the sole purpose of facilitating WASH education in partnering schools and should not be used, edited, altered, reproduced, or distributed to others outside this Purpose, without the consent of WASH Education Pty Ltd.

Our Learning

Objective

- 💧 **Explain** why proper hand hygiene is a simple and effective habit to reduce the spread of germs and diseases
- 💧 **Demonstrate** good hand washing practices
- 💧 **Discuss** alternative methods of handwashing when water or soap are not accessible

What We

Will Talk About

1	Hand Hygiene
2	Hand-washing Practices
3	Alternative Methods of Hand-washing
4	Checking for Understanding
5	Activities to teach Module 5

Topic 1 Hand Hygiene

Understand the importance of proper hand hygiene in improving public health and well-being

01

Introduction to Hand Hygiene

What is meant by hand hygiene?

02

Importance of Hand Hygiene

Why is proper hand hygiene important to our health and well-being?

Introduction to Hand Hygiene

Refers to the practice of cleaning hands to remove dirt, germs, and other contaminants

Why is hand hygiene very important? Who teaches you about its importance?

Importance of Hand Hygiene

“

**Proper hand hygiene is a
cornerstone of public health
and personal well-being**

”

Preventing disease

**Promoting safe
environments**

**Ensuring a healthy
and dignified life for
all Filipinos**

Topic 2 Hand-washing Practices

Understand the importance of hand hygiene, identify key moments for handwashing, and learn proper techniques to effectively clean hands to prevent the spread of germs and illness

01

Hand-washing Frequency

When should we wash our hands?

02

Hand-washing Method

How can we properly wash our hands?

Hand-washing Frequency

WHEN should we be washing our hands?

Whenever reasonably possible!
But especially when...

Cough, sneeze or blow our nose

After using the bathroom

After playing outside

Before eating

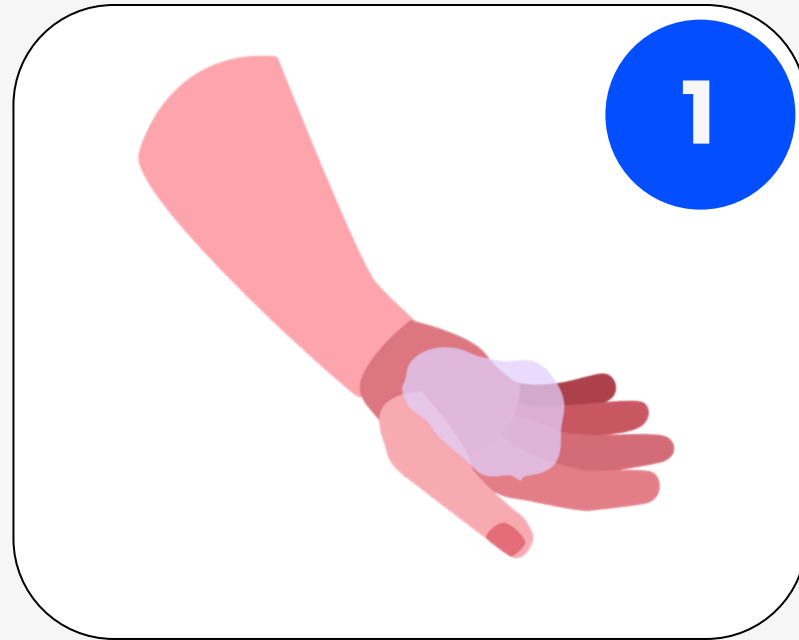

After touching animals or their environments

And when your hands look dirty

Hand-washing Method

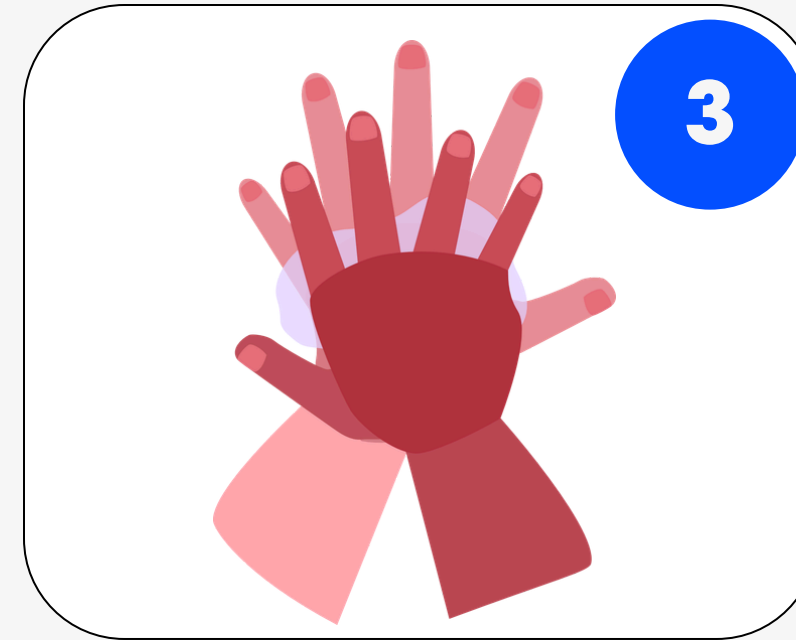

Hand RUB Method

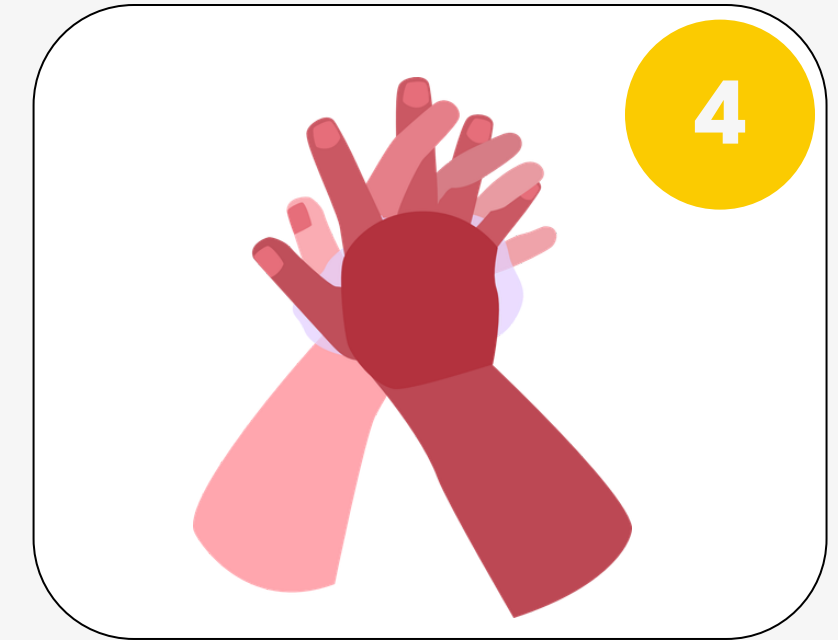

Apply a palmful of the product in a cupped hand, covering all surfaces

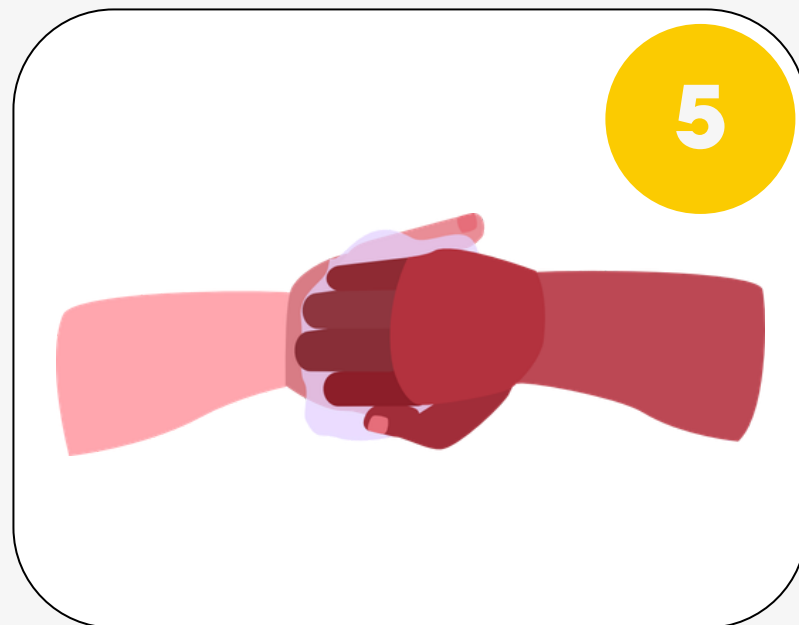

Rub hands palm to palm

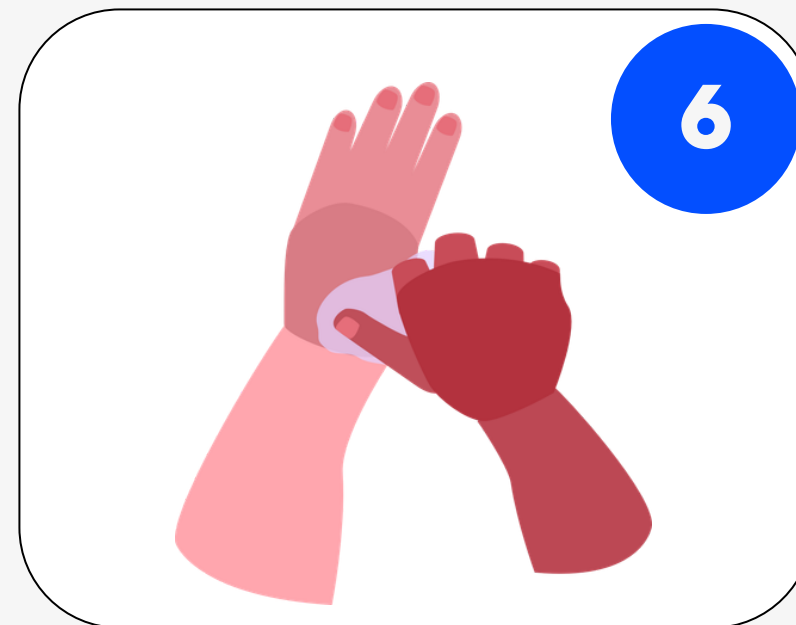

Right palm over left dorsum with interlaced fingers and vice versa

Palm to palm with fingers interlaced

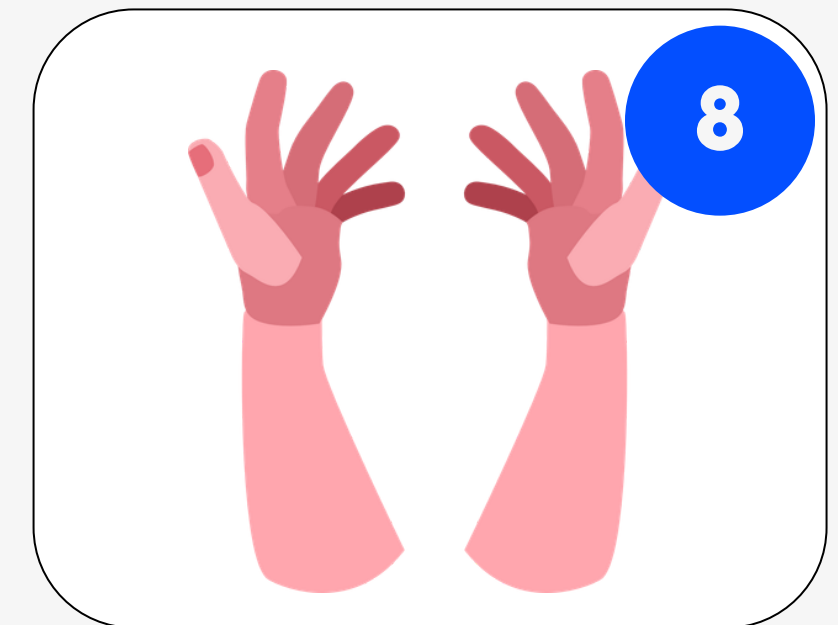

Backs of fingers to opposing palms with fingers interlocked

Rotational rubbing of left thumb clasped in right palm and vice versa

Rotational rubbing, backwards and forwards with clasped fingers in left palm and vice versa

Once dry, your hands are safe

Topic 3

Alternative Methods of Hand-washing

Understand the alternative methods and materials for hand hygiene in situations where soap, water, or alcohol-based hand sanitizers are unavailable

01

Alcohol-based Hand Sanitizers

What can we use to clean our hands when soap or water are unavailable?

02

Alternatives in Resource-constrained Environments

What are alternative solutions in situations with very limited resources

Alcohol-based Hand Sanitizers

When soap and water are unavailable, you can use alcohol-based hand sanitizers

60%

minimum alcohol content
for solutions to be effective
in killing germs and viruses

%

Benefits include:

- +** portable
- +** easy to use
- +** especially useful where access to clean water is limited

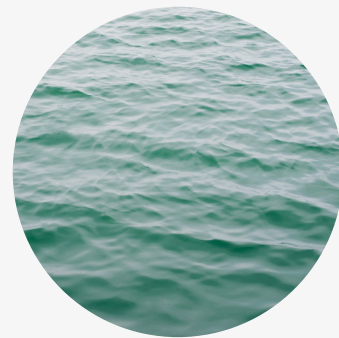

Alternatives in

Resource-constrained environments

Situations where water is not available

Drained rice water

**Clean river or
seawater**

**Water from
boiled vegetables**

Situations where neither soap nor alcohol-based
hand sanitizers are available

**Coffee
grounds**

**Coconut
husks**

Sand

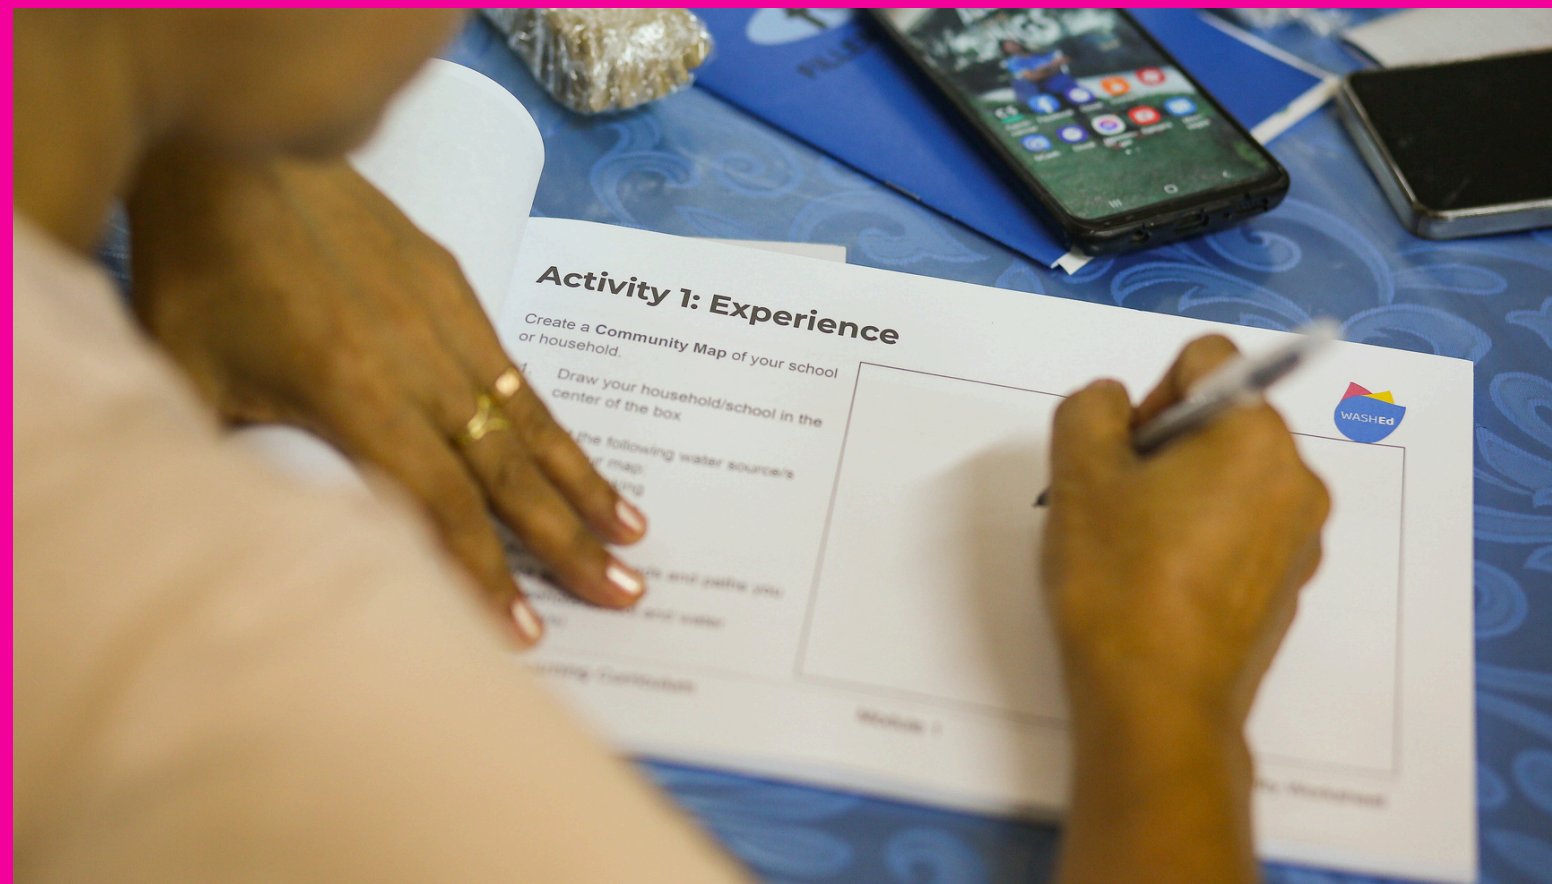

Ashes

Activities

to teach Module 5

- Classroom activities are designed using the **E-SPOT Framework** to engage Active Learning
- **Think-Pair-Share** approach is recommended for all activities

Activity 1: Experience

Activity 2: Share

Activity 3: Process & Observe

Activity 4: Try

Digital files for the classroom activities will be available from the WASH-Ed Learning Portal

Our Learning

Objective

- ✓ **Explain** why proper hand hygiene is a simple and effective habit to reduce the spread of germs and diseases
- ✓ **Demonstrate** good hand washing practices
- ✓ **Discuss** alternative methods of handwashing when water or soap are not accessible

Congratulations

WASH
Education

You completed
Module 5: Hand Hygiene
