Training

**Module 6: Disinfection & Other
Hygienic Practices**

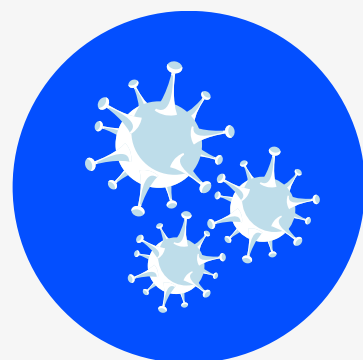

Version 2.0 (March 2026)

WASH-Ed Learning Curriculum

Module 1:

Water Resources & Accessibility

Module 2:

Water Safety & Health

Module 3:

Water Sustainability

Module 4:

Sanitation

Module 5:

Hand Hygiene

Module 6:

Disinfection & Other Hygienic Practices

WASH-Ed materials can only be used by the school and its teachers for the sole purpose of facilitating WASH education in partnering schools and should not be used, edited, altered, reproduced, or distributed to others outside this Purpose, without the consent of WASH Education Pty Ltd.

Our Learning Objective

- 💧 **Explain** the concepts of cleaning, hygiene, and disinfection
- 💧 **Distinguish** various disinfection techniques and applications
- 💧 **Discuss** ways to incorporate these practices into our daily life
- 💧 **Understand** the role of educators in promoting hygienic practices

What We

Will Talk About

1	Key Concepts
2	Disinfection Techniques
3	Incorporating Good Practices into our Daily Life
4	Checking for Understanding
5	Activities to teach Module 6

Topic 1 Key Concepts

Understand the differences between key concepts in disinfection and other hygienic practices and the role they have in helping maintain healthy and safe environments

01

Cleaning

02

Hygiene

03

Disinfection

Cleaning

“

Refers to the **removal** of dirt, dust, and impurities from surfaces

Cleaning **alone** does not kill germs, but it does **reduce** their numbers and the risk of spreading infection

”

How does ‘cleaning’ differ from ‘hygiene’?

Hygiene

Broadly describes practices that help to **maintain health** and **prevent the spread of diseases**, such as handwashing, bathing, and food safety

How does 'hygiene' differ from 'disinfection'?

Disinfection

“

Refers to the **process of using chemicals** to kill germs on surfaces which is crucial in preventing the spread of infectious diseases

E.g. Use of alcohol-based hand sanitizers

”

Can you remember the differences between the key concepts?

Topic 2 Disinfection Techniques

Understand the various disinfection techniques and their practical applications in everyday settings to effectively reduce the spread of germs and maintain hygiene

01

Various Disinfection Techniques

What techniques are commonly used?

02

Application of Techniques

How might these techniques be applied in everyday settings?

Disinfection Techniques

1

Chemical Disinfection

- Using solutions like bleach, alcohol, and hydrogen peroxide
- Can be purchased at local supermarkets or pharmacies

2

Heat Disinfection

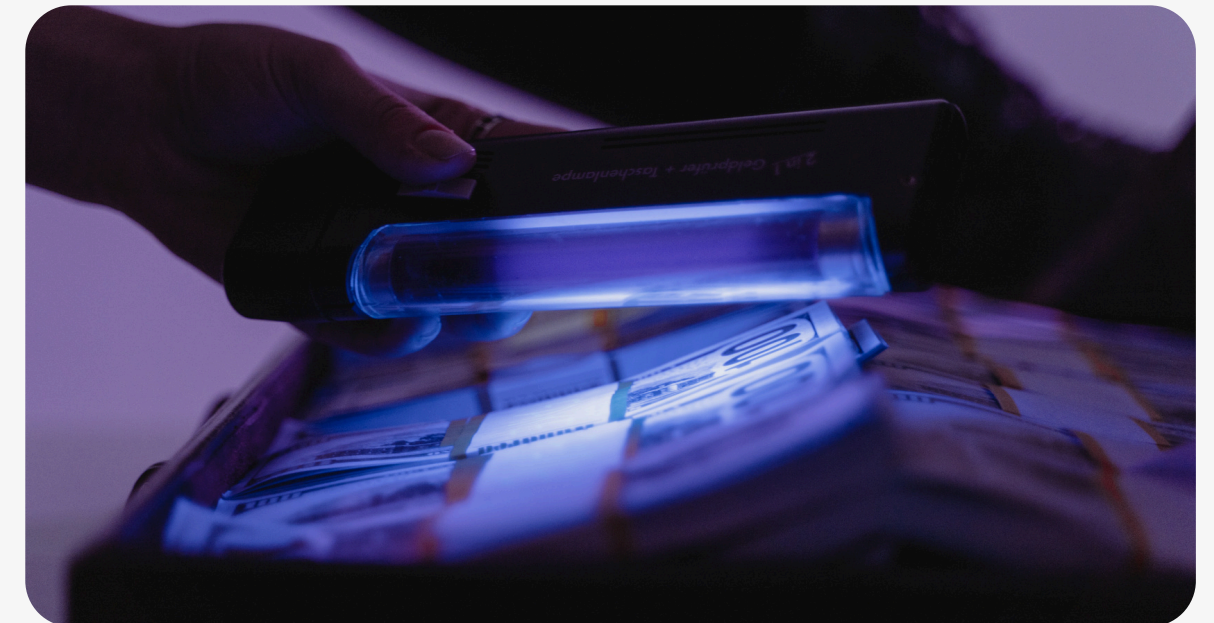

- Using high temperatures to kill germs, such as boiling water or using steam cleaners

3

UV Light Disinfection

- Using ultraviolet light to kill or inactivate microorganisms
- Can be found online or in specialized stores

Application of Techniques

“
How might these techniques be
applied in everyday settings at
home, school, and wider
community?
”

**Disinfecting high-touch
surfaces**

**Disinfecting shared school
facilities / amenities**

**Disinfecting public
spaces**

Can you think of examples for each?

Topic 3

Incorporating Good Practices into our Daily Life

Understand practical ways to incorporate disinfection and hygiene into daily routines and ways to promote these practices to foster a culture of cleanliness and health

01

Practicing Disinfection and Hygiene

How can we make disinfection and hygiene a part of our daily routine?

02

Role of Educators

How can we help foster a culture of cleanliness and health in schools?

Practicing Disinfection and Hygiene

The default approach is to always maintain good Hand Hygiene

20sec

Minimum time taken

for regular handwashing with soap and water

60%

minimum alcohol content

of sanitizers used when soap and water are not available

%

Other healthy habits include:

Surface Cleaning

Personal Hygiene

Role of Educators

Model Good Practices

Educate and Engage

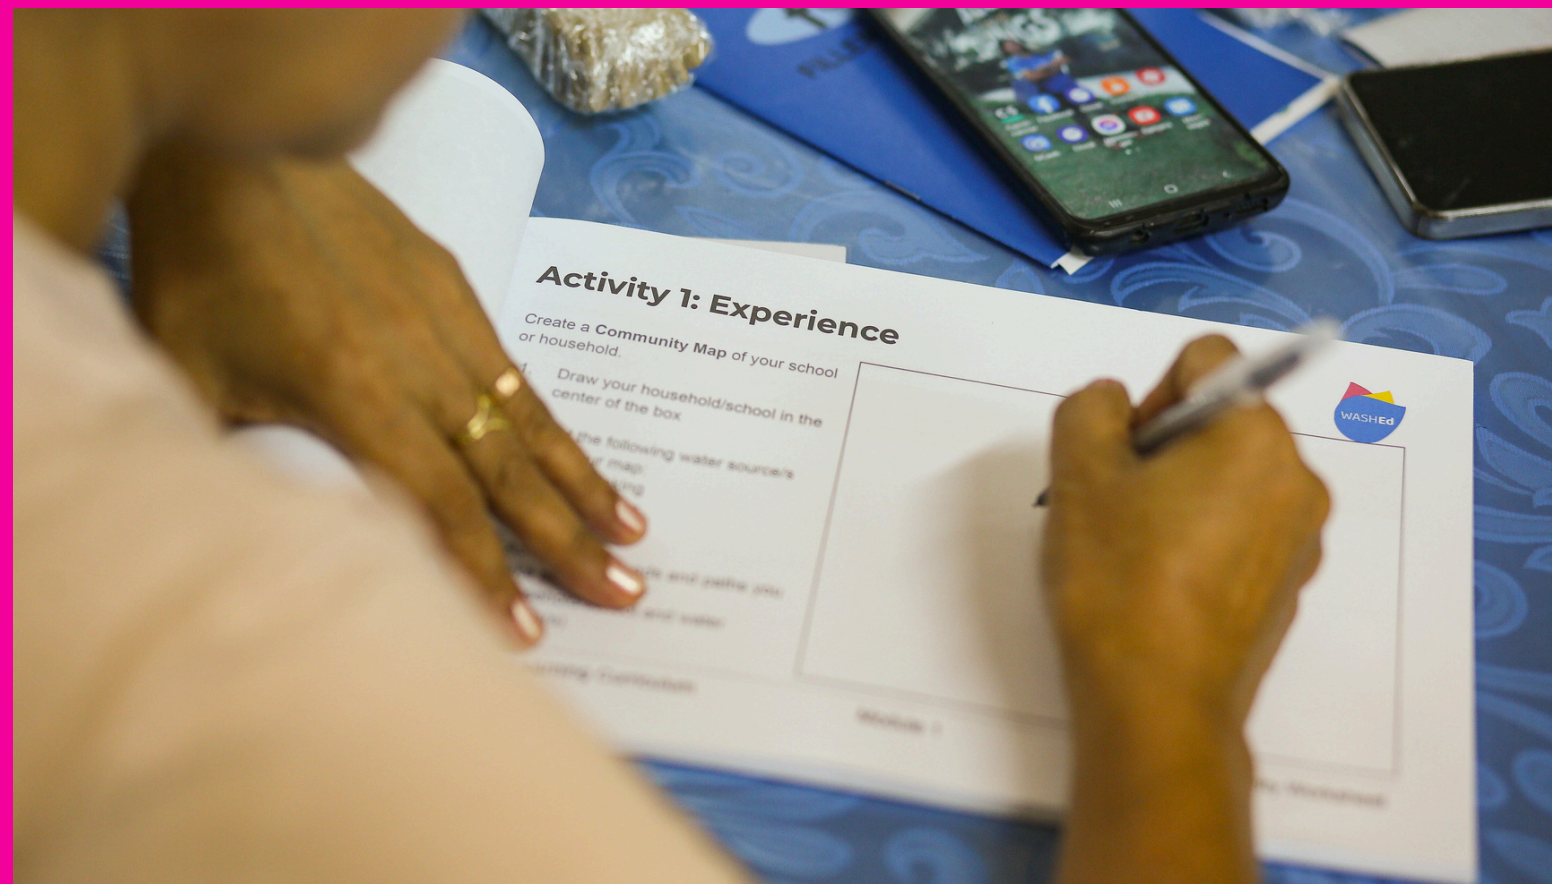

Community Involvement

Activities

to teach Module 6

- Classroom activities are designed using the **E-SPOT Framework** to engage Active Learning
- **Think-Pair-Share** approach is recommended for all activities

Activity 1: Experience

Activity 2: Share

Activity 3: Process & Observe

Activity 4: Try

Digital files for the classroom activities will be available from the WASH-Ed Learning Portal

Our Learning

Objective

- ✓ **Explain** the concepts of cleaning, hygiene, and disinfection
- ✓ **Distinguish** various disinfection techniques and applications
- ✓ **Discuss** ways to incorporate these practices into our daily life
- ✓ **Understand** the role of educators in promoting hygienic practices

Congratulations

WASH
Education

You completed **Module 6: Disinfection
& Other Hygienic Practices**

JOIN

our community and
let's stay connected!
